

First Tech Fund

We are a non-profit dedicated to supporting NYC students to ensure they have access to technology that will empower them to pursue educational, personal development, and career opportunities. We'd love for your student to apply to our 2020-2021 program, starting in September.

What We Provide Students:

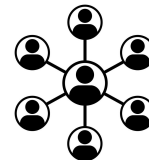

Access to Technology

All students deserve access to Wi-Fi and computers in their households, as it opens the door to a world of possibilities. Each of our 50 Fellows will receive a laptop and Wi-Fi stipend to access webinars and other training opportunities.

Career Pathways

Students will learn more about specific careers they're interested in, understand the path that others have taken to get there, and have access to professionals in those areas. Through career panels and other web based offerings, students will be able to learn from professionals all over the country. Through access to this network of young professionals, students will also be able to begin building their network for the future.

Unlocking New Opportunities

We know that there are often many barriers to getting into programs we're interested in - whether it's help with mock interviews, assisting with crafting personal statements, or even finding the right program for your specific career interest - First Tech Fund is there to help you discover the right opportunity for you and support you along the way.

Eligibility:

Students in 9th-12th grade who do not own a personal computer and reside in the five boroughs of NYC are encouraged to apply. You do not need to be a US citizen, but you must attend a school in NYC full time to be considered.

Don't wait - applications are due by **August 3rd!**
